

ABSTRAK

Purnama Shiddiq (11150167), Sistem Informasi Pengelolaan Data Nilai Siswa SDN Cipaku Perumda Berbasis Web

SDN Cipaku perumda yang berada di Kota Bogor Kecamatan Bogor Selatan adalah Sekolah Dasar Negeri yang menggunakan metode masukan nilai siswa secara manual , sehingga orang tua murid tidak mengetahui secara keseluruhan perkembangan anaknya di sekolah. Seperti rekapan nilai, tugas dan grafik perkembangan nilai anak secara real time. Sehingga dibutuhkan sistem baru untuk menunjang kekurangan seperti yang sudah di terangkan sebelumnya. Diperlukan sistem pengelolaan data nilai siswa berbasis web. Agar guru mudah memasukan dan mengelola nilai, murid mudah mendapat informasi tentang tugas dan nilai. Dan orang tua mudah mendapatkan informasi tentang nilai dan prestasi anak. Sehingga diharapkan dengan adanya sistem baru ini orang tua murid dapat mudah mengawasi perkembangan nilai anak dan berinteraksi langsung dengan guru , karena dalam sistem ini ada fitur pesan agar guru dan orang tua murid dapat lebih mudah berinteraksi tentang perkembangan nilai prestasi anak.

Kata Kunci : Sistem Informasi Pengelolaan Data Nilai Siswa, UML

ABSTRACT

Purnama Shiddiq (11150167), Student Value Data Management System SDN Cipaku Perumda Web Based

SDN Cipaku Perumda located in Bogor City, South Bogor District is a State Elementary School that uses student input method manually, so parents do not know the whole development of their children in school. Such as recapitulation of values, tasks and graphs of child value development in real time. So it takes a new system to support the shortcomings as has been explained previously. Web-based student data management system required. In order for teachers to easily enter and manage values, students are easy to get information about tasks and values. And parents are easy to get information about their grades and achievements. So it is expected that with this new system parents can easily monitor the development of children's value and interact directly with the teacher, because in this system there is a message feature so that teachers and parents can more easily interact about the development of child achievement value.
