

ABSTRACT

Dede Lia Mulyati (12140329), APPLICATION OF GOODS SUPPLY SYSTEM IN EMBROIDERY HERO SHOP WITH PERPETUAL INVENTORY METHOD BASED ON WEB

Inventories or often called inventories are deposits of raw goods, materials or finished goods that are stored for future use or within a certain period of time. Inventory of goods is very important in a company in the face of changes in production markets and anticipates price changes in the demand for many goods. Toko Hero Bordir is a store business that sells a variety of school uniforms. Simple cashier service system. The process of inventory data collection done manually rely solely on recording on a book alone, making it difficult for employees to see the amount of stock of goods available when consumers will buy with a lot. Sales reports also still use manual systems only recorded in a book, making it difficult in making a stock report of incoming goods and outgoing goods. Based on the description of the required web-based inventory of goods that can assist sellers in controlling inventory of goods in the warehouse.
