***Faisal Hadi Hidayat (11152583), The Selection Of The Best Student Scholarships Using The Profile Matching at SMA Cakra Buana Jakarta***

*As an appreciation of high achieving students, SMA Cakra Buana Jakarta held a program that is the best student held in each periode of semester, but for the best student program there is no systematic method for determining the best students. In addition, the selection is still subjective, based on the report card value only, with the implementation of the Profile Matching method, it is expected to be able to break the chain of subjectivity that has occurred. In this method the researcher uses four criteria factors, namely academic achievement, absenteeism, attitudes and behavior, and extracurricular as well as several sub-criteria in each criterion. The results of this study facilitate decision making in determining the best students with criteria that have been compiled using the Profile Matching method.*

***Key Word: Profile Matching, Selection Of The Best Student Scholarships***
