## ABSTRAK

**Hendra Jaya Putra (11141112), Perancangan Sistem Persediaan Barang pada UKM Deviante (Meat Shop).**

Sistem pelaporan user yang masih menggunakan cara manual yaitu dengan input data pada buku manual serta pada Microsoft office excel dan informasi kadaluarsa barang masih harus melihat secara actual sehingga banyak sekali lost dead stock produk. Dengan adanya permasalahan ini maka penulis bermaksud membuat konsep perancangan sistem persediaan barang, sehingga dari laporan data ketersediaan barang dan data kadaluarsa barang dapat dikontrol melalui aplikasi. Metode pengembangan pada aplikasi menggunakan konsep waterfall (air terjun) dengan konsep pemrograman berbasis object. Aplikasi tersebut menggunakan Bahasa pemrograman PHP dengan menggunakan basis data MySQL

**Kata Kunci: PHP, Pemrograman berbasis object, Sistem persediaan barang**

## **ABSTRACT**

***Hendra Jaya Putra (11141112), Design of Goods Inventory System at UKM  
Deviande (Meat Shop).***

***User reporting system that still uses manual method, namely by inputting data in manual books as well as in Microsoft office excel and out of date information that goods still have to see the actual so many lost dead stock products. With this problem, the authors intend to make the concept of inventory system design, so that the availability of goods data reports and expired data can be controlled through the application. The method of application development uses the waterfall concept with object-based programming concepts. The application uses the PHP programming language by using a MySQL database***

***Keywords: PHP, object-based programming, inventory system***
