PENDAHULUAN

Pada Era Disruptif dna revolusi industri saat ini, teknologi sangat berperan penting dalam mendukung semua aktifitas dan pekerjaan setiap manusia. Tentu bagi kita yang melek teknologi sudah mulai menerapkan dalam kehidupan kita sehari-hari terutama dalam menyelesaikan pekerjaan. Karena dalam dunia kerja dan bisnis diwarnai dengan persaingan yang sangat ketat. Mau tidak mau kita juga harus ikut bersaing agar jangan sampai tergeser oleh perkembangan zaman. Dalam dunia pendidikan saat ini pun tentu harus mengikuti perkembangan tersebut. Yaitu menerapkan teknologi dan aplikasi dalam membantu mempercepat proses administrasi.

SMK Muhammadiyah 4 Jakarta menerapkan teknologi dan aplikasi pada proses administrasi pendaftaran siswa baru agar administrasi lebih terstruktur dan rapih dan tentunya hanya membutuhkan waktu yang relatif lebih cepat. Melihat dalam aktifitas pendaftaran di lapangan masih sangat sederhana yaitu menggunakan media kertas sebagai pencatatan pendaftaran siswa baru. Hal tersebut tentu memiliki kekurangan dalam segi waktu dan keakuratan dan tentunya lebih rentan hilang dan rusak. Untuk mengatasi kekurangan tersebut, perlu dibuatkan sebuah aplikasi khusus untuk penerimaan siswa baru.

A. Pengenalan Aplikasi PSB

Aplikasi ini dibuat guna untuk kebutuhan dalam pencatatan administrasi penerimaan siswa baru yang sebelumnya dengan menggunakan media kertas ditransformasikan dengan menggunakan sistem aplikasi berbasis desktop. Pada aplikasi ini, setiap ada calon siswa yang mendaftar, petugas wajib memasukkan biodata siswa tersebut ke dalam aplikasi Penerimaan Siswa Baru (PSB) untuk disimpan sebagai data digital dan dihitung biaya yang harus dibayarkan.

Dengan dibangunnya aplikasi PSB ini memudahkan pengguna dalam hal melakukan pencatatan administrasi penerimaan siswa baru, serta mengetahui biaya yang harus dibayarkan. Sistem aplikasi ini dibuat berbasis Desktop agar mudah diakses di media pc yang tidak perlu membutuhkan jaringan internet. Aplikasi ini memiliki hak akses pengguna sebagai staf Administrasi dan Admin. Dalam aplikasi ini, admin dapat mengolah data siswa, pembayaran siswa. Sedangkan staf Administrasi dapat plotting kesiapan mengajar.

1. Kebutuhan Hardware
 - a. Laptop
 - b. RAM 2GB
 - c. Processor Intel Core i3
 - d. Harddisk 500 GB
2. Kebutuhan Software
 - a. netbeans 8.1
 - c. Xampp
 - d. OS Windows 7

B. Menjalankan Aplikasi PSB

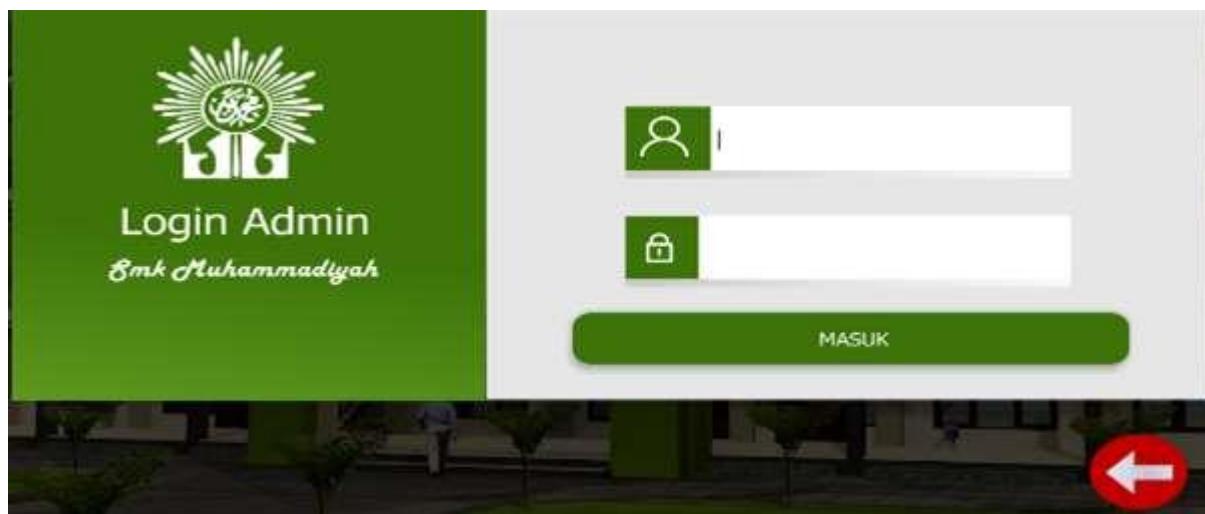

Aplikasi PSB ini dapat dijalan dengan melakukan double klik, maka aplikasi akan terbuka seperti tampilan dibawah ini.

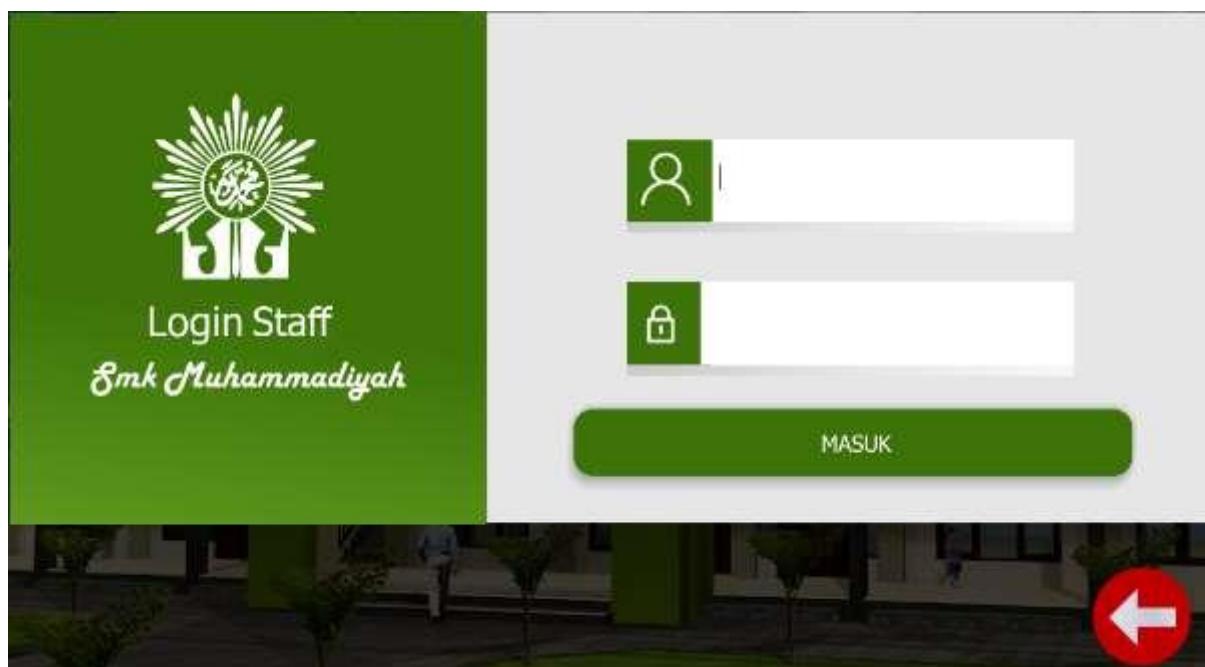

Pengguna admin atau staff harus melakukan login terlebih dahulu agar bisa masuk ke tampilan utama aplikasi PSB dengan cara pilih login sesuai dengan status pengguna. Lalu masukkan username dan password.

Jika username dan password benar, maka akan tampil pesan berhasil login dan akan masuk ke dalam tampilan utama yaitu portal Admin untuk admin dan portal staff untuk staff Administrasi. Namun jika pengguna salah memasukkan username atau passwordnya, maka sistem akan menolak masuk kedalam aplikasi dan meminta ulang untuk menginput usernama dan password. Hak Akses dalam aplikasi ini terdiri dari admin dan staff Administrasi.

Berikut tampilan halaman login admin dan staff Administrasi

Tampilan diatas adalah halaman login untuk pengguna dengan hak akses admin

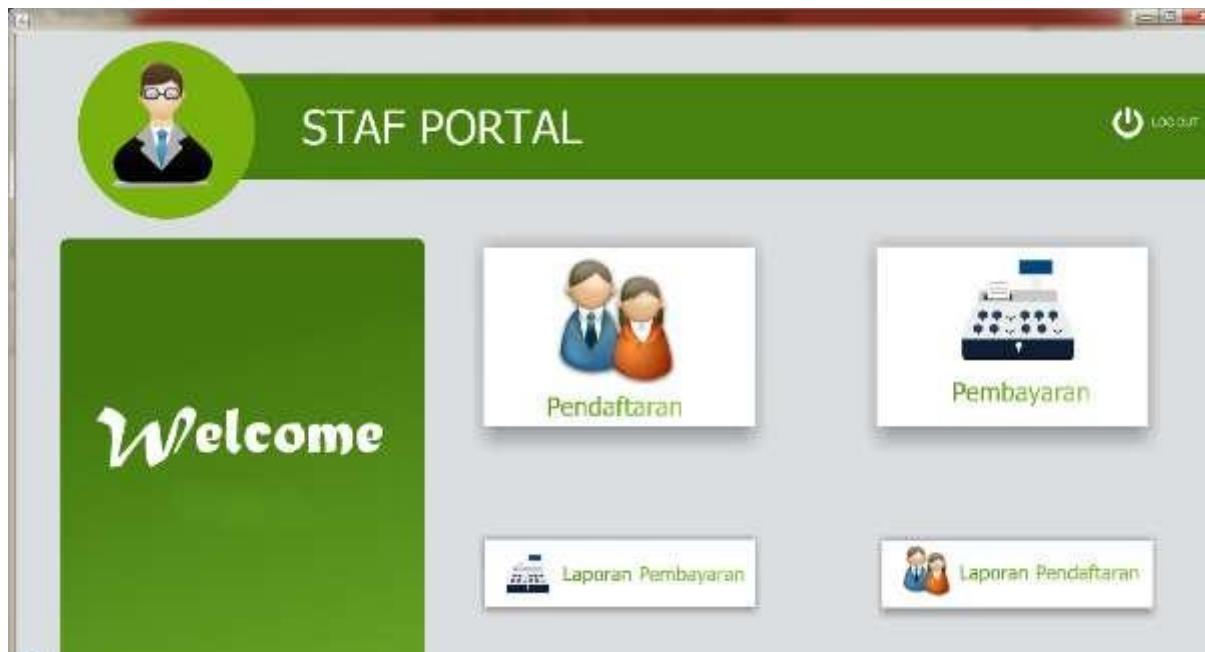

Tampilan diatas adalah halaman login untuk pengguna dengan hak akses staff administrasi. Ketika sudah melakukan login dan berhasil, maka tampilannya seperti berikut:
